KS4?

NONSUCH

HIGH SCHOOL FOR GIRLS

FORGING OUR PATHS; BUILDING THE FUTURE

An outstanding curriculum for all

Broad and balanced offer

- Something for everyone
- Specialization choices
- Challenging and engaging
- Building on prior knowledge
- Skills for life
- Encouraging diversity
- Building character and confidence
- Building global awareness

GCSE OPTION SUBJECT CHOICES

- History
- Geography
- RS (converts short course to full course)
- French
- Latin
- German
- Spanish
- Astronomy
- Computer Science
- Photography
- Physical Education
- Food Technology
- DT Textiles*
- Product Design*
- Fine Art
- Music
- Drama

* students cannot study both GCSE Product Design and DT Textiles

Core offer: Science, Maths & English

No setting

- Students across all classes will study exactly the same GCSE content
- One top tier of students (approx. 60 students). This group are taught at a faster pace so that they can study Certificate of Maths
- English: All the same texts
- All of our students are entered for the higher tier examinations

Core offer: RS

Option

Full course RS (1 GCSE) – select 2 more GCSEs plus two study periods. Ten GCSEs studied in total

Option

Short course RS (0.5 GCSE)- select 3 more GCSEs. Ten and half GCSEs studied in total

LIMITED SPACES

GCSE DT TEXTILES
Limited to 20 spaces

GCSE Food Preparation
40 spaces

CERTIFICATE IN FURTHER MATHS

1. What is the Certificate of Further Maths?
2. Why is it studied?
3. Who studies it?
4. If my child does not study it, does that mean she cannot go on to study A Level Maths and A Level Further Maths?

HOW YOU CAN SUPPORT YOUR CHILD

- Discuss future aspirations.
- Work backwards- career, degree, A levels
- What do they enjoy?
- **Avoid selecting what you think they should be studying**
- Review the GCSE course guide together
- Sixth form prospectus- A level entry requirements
- Career Advisor
- Unifrog

2025-2027

Head of Year: Mr J Davison
Deputy Head: Ms H J Wright

GCSE Computer Science

Examination Board: AQA
Examination: 100%

Why study GCSE Computer Science?

If you found yourself with more questions than we covered in KS3, or love that feeling of success when a program finally works, then Computer Science is for you.

Studying Computer Science gives you a deeper understanding of topics you have met already as well as a few new ones. Key computing concepts and the fundamentals of computer programming are recovered and extended through Visual Basic.Net which also helps you make the step towards industry-standard programming languages.

What are the benefits of GCSE Computer Science?

AQA have designed this specification to address industry concerns about "a lack of skills" in the Computer Science field and to provide an academically rigorous, valuable qualification. Nearly every employment sector will have some element of Computer Science involved and if you understand enough to be able to explain it to others, then you will find many companies that will want you to be able to translate between the technical teams and the delivery teams.

Perhaps you are more technically minded, in which case this course gives you the grounding you need to develop your skills in whichever programming language you end up using.

The classes are designed to help develop your knowledge and logical thinking, while encouraging you to explore your inquisitive nature to develop independent learning and problem-solving skills. The programming tasks introduce you again to a set of basic concepts and translates them from KS3 programming languages into Visual Basic.Net before applying them to a programmable solution as a team or individually. It lays the groundwork for learning, working and living in an increasingly digital world but does not aim to teach you how to use computers or software as this would fall into the IT specification.

Being digitally literate is important for the future, but being able to create the systems that will improve our existence requires Computer Science. If you love programming, and you are interested in what is going on inside a computer, or how data moves seemingly effortlessly across the world, Computer Science is for you.

Theory Topics:

As well as learning practical skills, you will study how and why computers work which then affects how we write the programs that interact with them. With some overlap from Physics, you will discover the micro world of how images appear on our screens, why telephone waiting line music always cuts out, what is inside the black box of a computer and why are Gaming computers so expensive? What is the internet? When we save to "the cloud" where does it really go? Is my digital data truly safe anywhere and what can I do to reduce my risk of cyber-attack? How do we get computers and printers to talk to each other? What impact are we having on our fragile planet through our use of Computer Science? What is the impact on humanity and is it heading in the right direction?

Support for Learning:

You will be issued with a textbook specifically written for the AQA GCSE qualification. Lesson content and additional learning materials are provided via

7

8

SharePoint and Teams, so that you can access, revisit or review content whenever you wish. Most homework will also be set, submitted, marked and returned using Teams or in your exercise book. At the end of each unit, we would offer short-term peer mentoring if you struggled with the content. You will be asked to sit a second test at the end of this to measure improvement or identify further need for support.

We recommend having access to a Windows-based computer for the course so that there are no compatibility issues with the software we use. Whilst we try to keep to online software, we may have to use programming software which requires loading onto a computer. As such, it is assumed that you will have primary or equally shared access to a computer at home that can have software installed or will work during Twilight sessions.

Theory Assessment (100% of the GCSE assessment)

At the end of Year 11 you will sit two written examinations. The papers consist of a mix of multiple choice, short-answer, longer-answer and extended response questions. The first paper assesses programming (with hand-written questions set in Visual Basic), practical problem solving and computational thinking skills and the second assesses your theoretical knowledge.

Practical Assessment

Throughout the course, you will rediscover the programming concepts covered at KS3 and look at more data structures. These skills will be assessed as we go along, building up in complexity. Paper 1 assesses your programming logic and understanding of structures, using a combination of pseudocode, flowcharts and Visual Basic. This is a handwritten assessment, and students need to be prepared to put in the practice outside of lessons both in computer-based and hand-written coding. There is no NEA assessment in this course.

Other opportunities

There are always plenty of clubs to be led by students and the Computer Science Department is always open to ideas if there is an area you feel particularly passionate about. We usually have year 10s running our Cyber Club for KS3, and we also open applications for CS mentors around the Autumn half term.

APPENDIX B: SPECIAL ENTRY REQUIREMENTS TO A LEVEL COURSES

The **minimum** requirement for entry to the Sixth Form at Nonsuch High School for Girls is an average point score of 6 over their best eight GCSE subjects and a grade 6 in English (either Lang or Lit) and Mathematics.

Subject	Exam Board	Criteria
Art & Design: Fine Art	AQA	Minimum of a grade 7 in GCSE Art or portfolio seen (if Art GCSE not taken)
Biology	OCR	Minimum of a grade 7 in GCSE Biology
Chemistry	OCR	Minimum of a grade 7 in GCSE Chemistry
Computer Science	AQA	Minimum of a grade 7 in GCSE Computer Science or a grade 7 in Mathematics if Computer Science GCSE not taken
DT: Product Design	AQA	Minimum of a grade 7 in GCSE Product Design or portfolio seen (if Product Design GCSE not taken)
Drama	AQA	Minimum of a grade 7 in GCSE Drama or by audition (if Drama GCSE not taken)
Economics	Pearson	No additional requirements
English Literature	AQA	Minimum of a grade 7 in GCSE English Language or Literature
French	Pearson	Minimum of a grade 7 in GCSE French
Geography	AQA	Minimum of a grade 7 in GCSE Geography
German	Pearson	Minimum of a grade 7 in GCSE German
History	AQA	Minimum of a grade 7 in GCSE History
Latin	OCR	Minimum of a grade 7 in GCSE Latin

Subject	Exam Board	Criteria
Mathematics	Pearson	Minimum of a grade 7 in GCSE Mathematics
Mathematics (Further)	Pearson	A grade 9 in GCSE Mathematics and must be taken alongside Mathematics and with 4 A Levels
Music	Pearson	Minimum of a grade 7 in GCSE Music or a Grade 5 or above in Music Theory and a Grade 6 or above in an instrument is required (if Music GCSE not taken)
Physical Education	AQA	Minimum of a grade 7 in GCSE PE or evidence of sporting, dance or coaching competence (if PE GCSE not taken)
Physics	OCR	Minimum of a grade 7 in GCSE Physics
Politics	Pearson	No additional requirements
Psychology	AQA	No additional requirements
Philosophy & Ethics (RS)	OCR	No additional requirements
Spanish	Pearson	Minimum of a grade 7 in GCSE Spanish

*Students who have studied combined science and wish to study either Biology, Chemistry or Physics need a minimum of one grade 7 and one grade 8 and are advised to study one science only.

[HOME](#) → [QUALITY OF EDUCATION](#) → [YEAR 9 OPTIONS PROCESS](#)

Year 9 Options Process

We offer a very broad range of subjects at Key Stage 4.

Our offer for 2023-25 includes English Language and Literature, Mathematics, Triple Science, a half course in Religious Studies and a modern foreign language. All students study for at least ten GCSE qualifications and some opt to study for ten and a half.

The optional subjects are:

EXAMINATIONS

FILLING IN THE ONLINE FORM

Step 1 of 3

[Start](#) > [Choice 1](#) > [Free choice](#) > [Confirmation](#)

Choose ONE of the following Subjects:

- German (De)
- French (Fr)
- Spanish (Sp)

Next

FILLING IN THE ONLINE FORM

Step 2 of 3

[Start](#) > [Choice: French](#) > Free choice > Confirmation

- The numbers 2,3 and 4 are not showing order of preference.
- Short course RS does not need to be selected.
- In the example to the right, this student has selected three GCSE options.
- The system knows that this student will then study short course RS.
- Submit.
- Request for an email confirmation.

Please enter your 3 choices by entering 2, 3, 4 in the box by your chosen subjects.

Subject	Choice
Photography (Ap)	<input type="text"/>
Fine Art (Ar)	<input type="text"/>
Astronomy (As)	<input type="text"/>
Computer Scienc (Cs)	2
German (De)	3
Drama (Dr)	<input type="text"/>
French (Fr)	Already selected
Geography (Gg)	<input type="text"/>
History (Hi)	<input type="text"/>
Latin (La)	<input type="text"/>
Music (Mu)	<input type="text"/>
Product Design (Pd)	<input type="text"/>
Physiscal Educ (Pe)	<input type="text"/>
Religious Study (Rs)	<input type="text"/>
