Clear sequencing of content	<p>The SoL shows how language knowledge and practice can be sequenced and re-visited to support progression in the early stages of language development within a low exposure foreign language setting.</p> <p>The SoL aims to avoid introducing too much language too fast. Introducing no more than one new main grammatical function every two weeks is likely to set sufficient amount of 'desirable difficulty'. This takes into account the other content and practice requirements: vocabulary, phonics, and the sequencing of practice in modes and modalities that one feature needs, as well as planned revisiting of language and structures.</p>
